

SFC

Batman

December 16, 2013

Date Performed: December 31, 2013
Partners: Robin

1 Changes

There is no significant update in SFC side. We only have three changes:

- a. A new Cisco catalyst 2960G installation in SFC's NOC.
- b. A new NAT64 server based on OpenBSD-5.4-CURRENT.
- c. Routing daemon updates to Quagga-0.99.22.4 in nara-gate router.

Because only a new NAT64 server has big significance in our operation, we will discuss in next paragraphs.
